

Excel for Genealogists

Saturday, December 08, 2018

1:00 to 3:00 PM (PDT)

Spreadsheets are fun! Stewart loves spreadsheets! He uses spreadsheets at work every day as an IT Manager. He is an expert in Microsoft Excel using it in genealogy very frequently. Laying out all the data in Excel can help researchers see gaps in knowledge or correlations between data points. Breakthroughs can easily happen by visualizing data in spreadsheets. Stewart shows many examples of his use of spreadsheets to track newspaper clippings, a vital records catalog, tracking ancestor addresses over time, and tracking whole families over many censuses. Stewart trains users to use Excel filter, sorting, color coding, calculations and many other functions.

This is a hands-on class. Please bring a laptop with Excel loaded. We will only cover Microsoft Excel in this class. No other spreadsheet programs will be taught during this class

Instructor Stewart Blandon Traiman has been studying genealogy for thirty years. He began by interviewing parents, grandparents and other relations about his roots in Nicaragua. When he married Leland Traiman 28 years ago, he took on the new adventure researching Ukrainian and Polish Jews. Stewart has researched his children's origins back to the colonial United States. Stewart has also just launched his own genealogy practice, *Six Generations*. Go to <http://sixgen.org/>

Free for CGS members. Non-member admission fee is \$30.00* and will apply toward a one year CGS membership
